

OMHSAS Telehealth Survey

The survey is available [here](#). Please share this survey with Members.

Due to COVID-19, telehealth and telephone service delivery has significantly increased. The Office of Mental Health and Substance Abuse Services (OMHSAS) is asking for Members' help to make sure that future behavioral health services through telehealth meet their ongoing needs. This survey is for individuals who received behavioral health services over the past several months. If multiple family members received services, you may complete the survey separately for each individual.
