

IBHS Provider Education Sessions Continue

During this time of transition from Behavioral Health Rehabilitation Services (BHRS) to Intensive Behavioral Health Services (IBHS), Magellan and our county partners continue to work closely with Pennsylvania's Department of Human Services (DHS) and our providers to ensure a smooth transition for both our provider network and members. As new IBHS providers are contracted, they are added to Magellan's online [provider search](#) and [provider directories](#). No BHRS will be provided after January 17, 2021.

Over this past year, Magellan has hosted approximately 20 IBHS education sessions to include provider workshops, prescriber forums, family workgroups, stakeholder forums and more. All of these sessions included important IBHS updates and attendees were able to ask questions related to the IBHS implementation. The recordings for these meetings, our IBHS FAQ, important assessment and report documentation, and the schedule for future provider workshops, can be found on our [IBHS webpage](#).

In addition to these larger group workshops, Magellan staff are also available to offer half-hour technical assistance calls to any provider interested. For more information about these individual call opportunities as well as any other IBHS related questions, please email IBHS@MagellanHealth.com.
